How to Set up Your Co-bot 20 House Care Assistant

Introduction:

Do you wish that your bedroom would magically tidy itself? Are you sick and tired of your parents nagging you to put your toys away? If so, the Co-bot 20 is the answer to all of your problems! The friendly and helpful Co-bot 20 is the perfect house care assistant for you and your family. This magnificent machine has the ability to listen, speak, see and understand its owner. With its state of the art robotics and high specification cameras this robot is one of a kind! The scientist Professor McCobot has designed this incredible invention to take care of all your chores and household tasks. Simply follow the instructions so you are ready to set up your assistant safely and securely.

How to Set up Your Co-bot 20 House Care Assistant

How to Get Started:

1. First, make sure your robot is fully charged. To do this, plug the Co-bot 20 into the charging station for at least two hours. The bright, green light will begin to flash when your robot is fully charged.
2. Next, use your voice to activate the robot. Make sure you speak clearly and politely to the robot and introduce yourself and your family.
3. Then, identify which task you would like your Co-bot to do first. E.g. Please wash the dishes until they are sparkly clean.

Back End Lesson

How to Set up Your Co-bot 20 House Care Assistant

How to Get Started (continued):

4. Now wait patiently for your Co-bot to complete the task given. Your Co-bot will happily talk to you whilst completing its chores or it can complete them in silence.
5. Afterwards, rate your Co-bot from 1-5 and insert the numbered tokens into the slot at the top of its back. 5 means you are very satisfied with the outcome. If you are not happy with the outcome, then please explain why to your Co-bot so it can complete the task again.
6. Finally, re-charge your Co-bot using the charging station until it is needed again.
