

Times Tables Treasure Hunt

Times Tables Treasure Hunt

You will need:

- 2-4 players
- 1 die
- Times Tables Treasure Hunt game board
- 1 counter per player
- A pack of times tables cards (included – choose the times tables you would like to practise.)

How to play:

1. Players start by placing their counter on any plain space on the board (not a treasure chest).
2. The aim of the game is to collect as many pieces of treasure as possible. To do this, the player must roll the exact number needed to land on a treasure chest. The player will then need to answer a times tables question correctly in order to keep a piece of treasure, which will be added to their score. If a treasure chest can't be landed upon, it must be treated as a normal space.
3. The youngest player goes first. Roll the die. You may move in any direction. If you land on a treasure chest, pick up a times tables question and answer the question. If the other players agree that your answer is correct, you earn one piece of treasure. This could be counted as a tally of points, counters or cut out the gold coins provided before the game!
4. The game can be played until either a certain amount of treasure has been collected (10 is a good number for a two player game) or for a given amount of time and the player with the most pieces of treasure wins.

Good luck and enjoy the game!
